About Me

I am a Web Developer who creates websites and web applications that are easy to use and look good on all devices. I work from the beginning of a project – understanding what the client needs – to the end, where everything is working properly. I also make sure the website runs fast, is secure, and is easy to manage.

WORK EXPERIENCE

oct 2024 - present

Kodexive Technologies PVT.LTD

Web Developer / Tech field

- Build and deliver web solutions for clients based on their business needs
- Communicate with clients regularly to discuss updates, changes,
- Help junior developers by guiding them on coding and project structure

PROJECTS

- **Taxi Booking Web Application**
 - Created an online platform to book cabs with fare calculation, driver status, and admin ride management.
- **Salon Management System**
 - Built an admin panel for managing salon staff, services, and bookings with image upload and status toggles.
- **Custom WordPress Blog Theme**
 - Developed a responsive blog theme with dynamic posts, SEO-ready layout, and customizable widgets.
- **Personal Portfolio Website**
 - Designed a modern, mobile-friendly website to showcase projects, resume, and contact information.
- **E-commerce Product Catalog**
 - Created a simple product listing website with categories, filters, and add-to-cart functionality using PHP and MySQL.
